

RadioRA2

Level 2 Certification Training

RadioRa2 Level 2 (L2) Training is an instructor-led, two-day course that utilizes fully functional lab equipment in order to build a stronger foundation and understanding of L1 training concepts as well as implementing advanced concepts of the RadioRa2 inclusive software. Advanced concepts include networking, commissioning two main repeater systems, time-clock programming, HVAC programming, and 3rd party integration. What are the benefit of Level 2 Certification?

- 200 Device Inclusive Software
- Advanced training and Integration
- Software File Extraction from existing projects
- Access to additional certification programs

This is an investment in the future of your business. Plan on spending two days in a fully functional lab environment learning the advanced features of RadioRa2. The cost of the training is \$225/day and includes the training curriculum, lunch both days and a networking dinner on Monday evening.
